

ORamaVR SA

Fair-Use Policy

OVR-POL-006 · v.2_R · Issued — Release Edition v.2_R · 11 June 2026

oramavr.com/legal/fair-use

1 Status and purpose

1.1 This Fair-Use Policy (OVR-POL-006) is an ORamaVR Standard-Form Document, published at oramavr.com/legal/fair-use. It sets out the current fair-usage limits referenced by, and read together with, the ORamaVR Acceptable Use Policy (OVR-POL-004) §6. Capitalised terms not defined here have the meanings given in the Acceptable Use Policy and the ORamaVR Master Glossary (OVR-GLO-001).

1.2 These limits exist to protect platform stability and fair access for all Users. They are not entitlement caps: contractual entitlement (for example, licensed CCU count) is set in the applicable Order Form, Schedule, or Principal Agreement and prevails over this Policy where the two address the same quantity.

1.3 ORamaVR may update these limits from time to time, by publishing a revised version at the URL above. A change that materially reduces a limit takes effect on not less than thirty (30) days' notice; any other change takes effect on not less than ten (10) days' notice, in each case in accordance with the Standard-Form Document Amendments mechanism in the applicable Principal Agreement.

2 VTC Platform

Dimension	Current limit
Concurrent Users (CCU)	As set out in the applicable Order Form or Schedule. Overage is handled by add-on concurrent-pack purchase or an increase in the contracted entitlement, not by this Policy.
Registered Authorised Users	Unlimited per Client Tenant. Only concurrent active sessions (CCU) are constrained, in line with the licensed CCU count.
Storage per Client Tenant	No per-tier cap. VTC operates on a CCU floating-licence model; simulations are hosted and sized by ORamaVR. Customer-generated data (analytics, session records, learner rosters, IFU PDFs ingested into JARIA) is governed by the general anti-abuse threshold in §6 and by ORamaVR infrastructure capacity.
API rate limits	Not applicable. The platform API is not publicly exposed in the Creator or VTC tiers. Where API access is later made available under a Developer or OEM tier, rate limits will be published at that time.

3 SIM Library

Dimension	Current limit
Subscribed titles	No volume cap on the number of SIM Library titles an organisation may subscribe to. Licensing is per SIM, per organisation, per year, as published in Schedule LIB (OVR-SCH-007).
Concurrent sessions per SIM	Aligned to the End Customer's licensed CCU count. No additional per-SIM session limit is imposed beyond the CCU entitlement; the CCU ceiling applies on an aggregated basis across all SIMs in use.

4 Creator Pro

Dimension	Current limit
Authorised Users per seat	One (1) named Authorised User per seat; non-transferable except as permitted under the Creator Pro EULA (OVR-CRE-001) §6.
OMEN text prompts	Unlimited per seat per month.
OMEN image generation	30 generated images per seat per month (hard cap; throttle on overage; no automatic charge). This is the contractually-bound figure and prevails over any higher figure in product collateral.
Medical 3D Asset Library downloads	Unlimited per Creator Pro seat per month.
Derivative Work compiles / builds	Unlimited per Creator Pro seat per month.

5 General anti-abuse threshold

5.1 ORamaVR reserves the right to investigate and remediate usage patterns that are materially inconsistent with the size, stated purpose, or permitted use of a User's subscription — including automated scraping, credential sharing beyond the licensed seat or CCU count, denial-of-service-like load, and circumvention of the CCU model — in accordance with the tiered enforcement mechanism in Acceptable Use Policy §8.

5.2 Nothing in this Policy limits ORamaVR's rights or a User's obligations under the Acceptable Use Policy, the applicable Principal Agreement, or applicable law.

Document Control

Version	Date	Status	Notes
v1.0-R	4 June 2026	Archived — superseded by v.2_R	Initial Fair-Use Policy; limits relocated from AUP §6. Numeric values to be confirmed by Commercial / CTO before publication.
v.2_R	11 June 2026	Issued — Release Edition v.2_R	v.2_R release: removed pending-confirmation note (Section 1.4); numeric fair-use values confirmed by Commercial and CTO; version unified.
